

Grove Street Methodist Church Register of Burials.

The original building on this site was erected in 1822 with a minister's house attached to each side.

There was a small graveyard behind opened in 1823 and closed for burials in 1866.

The original register, deposited in Nottinghamshire Archives, indicated the position of each plot by row letter and number.

At some point the site was levelled and surviving grave stones moved to the perimeter wall and it is no longer possible to identify individual graves.

Another records contains the legible details from surviving stones.
